14 Describe the organizational action and, if applicable, the date of the action or the date against which shareholders' ownership is measured for the action ▶ **On November 16, 2017, Company announced a 5% stock dividend. The dividend was payable on December 29, 2017 to shareholders of record on December 15, 2017. Cash in lieu was paid on fractional shares based on the stock's market value at the close of business on December 15, 2017.**

15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶ **Each shareholder received a 5% increase in the number of shares that they held on December 15, 2017. Company had 6,218,349 shares of record on December 15, 2017. Therefore, as a result of this 5% stock dividend an additional 310,782 shares were issued on December 29, 2017 with the remaining 135.45 fractional shares paid in cash.**

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ▶ **On December 28, 2017 the market value of the company's common stock was \$29.58 per share prior to the stock dividend. The change in basis to the individual shareholder as a result of this stock dividend would be calculated by taking the adjusted basis of the old stock (that is of the stock on which the dividend was distributed) and allocating it between the old and new stock on the date of distribution. This organizational action would result in a decreased per share basis and an increase in the number of shares held by each taxpayer.**
